mustafaozyurek@hotmail.com

EDUCATION

Master in Software engineering with AI

Università della Svizzera italiana
2026-2028 (expected)

Bachelor of Science in Informatics

Università della Svizzera italiana
2022-2026

Swiss Commercial Matura (Cantonal Level)

Scuola cantonale di Commercio
2017-2022

Swiss Federal VET Diploma – Commercial Employee (EFZ)

Scuola cantonale di Commercio
2017-2022

TECHNICAL SKILLS

Programming Languages

Java, Python, C, C++, SQL, JavaScript

Web & Frontend

HTML, CSS, SmartUI (SmartPages)

Backend & Database

Spring Boot, MongoDB, Node.js, REST APIs

Tools

Git

LANGUAGES

- Italian – Native
- Turkish – Native
- English – Advanced

PROFILE

Computer Science graduate currently pursuing a Master's degree in Software Engineering with AI, with a strong interest in software development, system design, and artificial intelligence. Through academic and industry projects, I have gained practical experience in frontend and backend development, AI service integration, and enterprise applications. I am motivated to further strengthen my technical expertise and contribute to the development of reliable, well-structured, and intelligent software systems.

WORK EXPERIENCE & PROJECTS

AnswerConsulting – Industry Internship Project

2025

Software Atelier 5 – Università della Svizzera italiana

AI-Driven Automation for Enterprise Content and Workflow Management

- Contributed to the development of AI-driven workflows within an Enterprise Content Management (ECM) system
- Developed frontend components using JavaScript and SmartUI (SmartPages framework)
- Integrated AI-driven services into the user interface
- Managed API communication between frontend components and Groovy-based backend services

Bachelor Thesis – Autonomous Vehicle Simulation

Università della Svizzera italiana, 2025-2026

Identifying Human Driving Anomalies from Real-World Incidents for Autonomous Vehicle Simulation

- Analyzed real-world incidents to identify anomalous human driving behaviours
- Developed a pipeline to transform real-world incidents into CommonRoad simulation scenarios
- Integrated large language models to support anomaly classification and scenario generation
- Designed and validated multi-vehicle autonomous driving scenarios and their critical interactions
